

# Dairy Donkey Farming and Donkey Milk Production for vulnerable Infants

## Invited speakers

### Donkey milk peculiarities

*Laura Cavallarini  
ISPA CNR, Italy*

*Photis Papademas,  
University of Cyprus*

---

### Dairy Donkey Farming

*Emanuela Valle,  
University of Torino, Italy*

---

### Donkey Milk for Vulnerable Infants

*Enrico Bertino,  
University of Torino, Italy*

The event intends to present the opportunities and challenges for a donkey milk production chain, a win-win system that puts together the production of a high-value food for sensitive consumers and sustainable farming.

The discussion will start from presenting the unique biological and nutritional characteristics of donkey milk, and the most recent advances in donkey farming for milk production and it will be closed by sharing the speakers' experience on donkey milk use in clinical nutrition of allergic children and premature infants.

## FAO SCIENCE AND INNOVATION FORUM
