

Side Event to the FAO Science and Innovation Forum

Genomic solutions for improved nutritional qualities

October 14th, 2022 (*online only*)
11:00-13:00 (Central European Time)

[CLICK HERE TO ATTEND VIA gotomeetings](#)

With a review talk on recent achievements in food bio-fortification, followed by 4 examples, we'll explore how genomics can improve production in response to specific nutritional needs

The academic perspective will be complemented by the industry point of view. In particular, micronutrients, vitamins and anti-nutritional factors will be targeted

Invited speakers

**Angelo Santino
(ISPA, CNR)**

Genomic solutions for the improvement of nutritional quality

**Francesca Sparvoli
(IBBA, CNR)**

Tailoring more nutrient and healthy beans: from lab to fork

**Incoronata Galasso
(IBBA, CNR)**

Camelina sativa an ancient oilseed crop able to fortify food

**Alberto Dezza
(CEO, Blumen)**

From Lab to Fork.. passing through Breeding

**Marco Bernasconi
(FLANAT)**

*A Life CycleThinking
APPROACH TO A
SUSTAINABLE FOOD
VALUE CHAIN*
