IEEE 2024 INTERNATIONAL
WORKSHOP ON
MEASUREMENTS
AND APPLICATIONS
IN VETERINARY AND
ANIMAL SCIENCES

The aims of the **IEEE International Workshop on Measurements and Applications in Veterinary and Animal Sciences (MeAVeAS)** are to comprehensively explore the various aspects of interactions among the realms of instrumentation and measurement, bio engineering, material science, chemical and biological measurements, and the field of veterinary medicine and animal and food science. The Workshop provides a platform for researchers, veterinarians, and animal scientists to engage in the exchange of ideas and information, establish connections and collaborations, and stay updated on innovations in the fields of veterinary medicine and animal science.

MeAVeAS is dedicated to bringing together professionals working on the **development of instrumentation and measurement methods**, not only for veterinary medicine but also for ecology and for food and animal science. Our focus extends to various aspects, including cutting edge technologies for monitoring the health of animals, metrology assisted production in the food industry, sensors and associated signal conditioning techniques tailored for veterinary medicine and animal science, as well as calibration methods for electronic test and measurement applications in these fields.

The Program Committee cordially invites submissions of Abstracts (400 words) for the IEEE MeAVeAS 2024 Workshop. We welcome interested researchers, academics, practitioners, and industry partners to submit abstracts for consideration at the Workshop. Abstracts that involve joint authorship with students, industry collaborators, and community partners are particularly encouraged. Additionally, an open invitation is extended to early career researchers and research students to contribute their work to this event.

ORGANIZERS

General Chairs

Claudio Forte

University of Torino, Italy

Alberto Vallan

Politecnico di Torino, Italy

Laura Cavallarín

National Research Council, Italy

Tecnical Program Chairs

Laura Ozella

University of Torino, Italy

Stefania Chessa

University of Torino, Italy

Cristina Lamberti

National Research Council, Italy

Alessio Carullo

Politecnico di Torino, Italy
